

# Accessing and processing files through local server interface

1

## dcTrack Model Compare Guide

- Provides user Friendly Interface to do Model Compares
- Provides top 3 Best matches agist current Model Library Data
- Provides Object Typing for Models

**\*\* Note:** Large Data sets may require isolating the Model Column before processing using Excel, or removing additional sheets from .xlsx data. This can greatly increase the processing speed of this application. Most General Size data sets will process as normal.

2

## Select the .xlsx file to open

- Sheet being processed MUST be the "Active" Sheet in the workbook.
  - "Active" Sheet is the sheet you were last using when the workbook was last saved.
  - If workbook contains only one worksheet the "Active" Sheet is defaulted to that single worksheet.
- Only works with .xlsx file extensions
- Resave your Excel file using .xlsx as needed \*Note: No data is saved or maintained after closing this tool

Open File

### 3 Select the Column from your provided .xlsx data the corresponds with the Models.

- Select the Orange Column Letter to Select the Column.
- The Selected Column with Highlight. \*Note: Depending on Data size this may take up to 10 Seconds for column to highlight

## 5 After Reviewing Models Select Being Process.

- This will do comparisons to the more recent Models Library and provide the best 3 matches to the provided model.
- Depending on Data Size there may be a delay in processing
- The provided Data is as follows:
  - Make
  - Model
  - Accuracy (How close the provided Model Matches an MLT model)
  - Object

The screenshot shows the Sunbird software interface. At the top, there is a header bar with the Sunbird logo and three buttons: 'Clear File', 'Open File', and 'Select The Model Column'. Below the header, there is a data table with columns A, B, and C. The table contains data for Texas, 1510, and Prime... with a value of 1 in column C. A dialog box titled 'Begin Process' is overlaid on the table. It contains an 'Export' button and a table with the following data:

Input Modal	dct Make 1	dcT Modal 1	Accuracy 1	Object 1	d
Model	...	...	...	...	...
C7000	...	...	...	...	...
BL460c GEN 9	...	...	...	...	...
Integrity BL890c i2	...	...	...	...	...

BL460c GEN 7	...	...	...	...	...
MDS 9396S	...	...	...	...	...
Integrity BL860c i4	...	...	...	...	...
Integrity BL870c i4	...	...	...	...	...
BL460c GEN 6	...	...	...	...	...

## 6 Optional: Export

- Export will create an Export .xlsx file of all provided data for use.
- Model\_(Your Provided File Name).xlsx

The screenshot displays the Sunbird application interface. At the top, the Sunbird logo is visible. Below the logo, there are three buttons: "Clear File", "Open File", and "Select The Model Column". In the center, a modal window titled "Begin Process" is open, featuring an orange "Export" button. The modal contains a table with the following data:

Input Modal	dct Make 1	dcT Modal 1	A
Model	Generic	Modem	80
